

TO WHOM IT MAY CONCERN

We have worked with Mike Rigby over a period of several years. Initially Mike provided our organisation, KK Satisfactory International - a Tokyo-based waste management company – with training and advice on how to develop and operate a carbon management service in Japan. This training incorporated the following elements: -

- Background to the carbon markets;
- The principles of carbon management;
- How to offer consultancy advice to clients;
- Sales and marketing training including public speaking on behalf of the organisation;
- Website support;

In addition to the above, which enabled us to establish a carbon management business in Japan, Mike has supported our carbon credit acquisitions, sourcing high quality credits for us to sell to our clients.

We have no hesitation in recommending the carbon management services of Mike Rigby, CEO of Copenhagen Carbon Management, and are very pleased with the work that Mr Rigby has done for us.
